Municipal Election At Westerdale

The election for councillor for the municipal district of Westerdale, aroused more than ordinary interest on Saturday, and a heavy vote was polled in both the divisions.

In Division 1 where it was estimated that 85 per cent of the voters cast their ballot, Mr. N. S. Clarke, the retiring councillor was defeated by Mr. Allen Hunsperger with a majority of 20 votes, the polling being:

Hunsperger 69
Clarke 49.

In Division 2 Mr. Godfrey Carlson, retiring councillor retained his seat with a majority of 12, the result being:

Carlson 56.
Craig 44.

WEDDINGS

The marriage of Mr. Ivan D. Graham and Miss Anita M. Reese took place at the United Church manse on Wednesday, February 24, Rev. A. J. Mitchell officiating.

The marriage of Mr. Steven Janssek and Miss Elsie May Shantz, daughter of Mr. and Mrs. Sydney Wright, was solemnized at the Evangelical parsonage on Wednesday, February 24th. Rev. H. J. Wood performed the ceremony.

Mr. Edward Thomas Edwards, of Didsbury, and Miss Eva Reist, of Carstairs, were united in marriage at the Knox United Church, Didsbury, on Tuesday, March 1st, Rev. A. J. Mitchell performing the ceremony.

Ladies' Aids Will Give Concert

A somewhat novel concert will be given in the Opera House tomorrow evening (Friday) by the Ladies Aids of Westerdale, Westcott, and Didsbury United Churches.

The concert will be in the form of a competition between the artists presented by the different groups, and a prize will be awarded to the winners. The decision will be given on the volume of the applause from the audience.

The program is certain to be an interesting one and the competition feature will add zest to the evening's entertainment. Admission 35c & 25c.

School Fair Annual Meeting.

The annual meeting of the Community Hall School Fair was held in the Hall on February 22nd.

The election of officers resulted as follows: P. McNeil, president; Wm. Bruce, vice-president, and Mrs. L. Hehn, secretary; Directors: P. Liesner, Jutland S.D.; E. K. Pratt, Grand Centre S.D.; George Clark, Mon S.D.; D. W. Wilson, Roseland S.D. and J. Wombold, Huntcliffe S.D.

The meeting decided to make plans for a fair this year.

Price of Milk is Down.

Mr. Tom Morris, of the Didsbury Dairy informs us that the price of milk and cream has been reduced.

Milk is now retailing at 14 quarts for \$1.00, and table cream 25 cents per quart, 15 cents per pint, and 10 cents per half pint.

LOCAL & GENERAL

Mr. and Mrs. Harvey Speelman visited their daughter in Calgary last week-end.

Messrs. Levan, M. Hugot and A. Russell were Calgary visitors on Saturday.

Miss Alice Pearson was visiting friends in Red Deer over the week-end.

Mrs. J. H. Murdoch, of Calgary is visiting Mr. and Mrs. Harvey Speelman this week.

The sermon-subject at the Knox United Church on Sunday evening will be: "The Vision of Isaiah."

Mr. E. Officer, C.P.R. travelling passenger agent, was a business visitor here on Tuesday.

The next monthly meeting of the "Y" Girls will be held on March 5, at the home of Mrs. Cunningham. Each member is requested to bring a clipping on anti-narcotics, to be read at the meeting.

Mr. W. J. Waters, who has been visiting here the last few months with his daughter and son-in-law, Mr. and Mrs. James W. Rupp, left recently for his home in Oakland, California.

The regular U.F.A. meeting will be held in the United Church building on Thursday, March 10th, at 2 p.m. Mr. Roy McNaughton, delegate to the convention, will give his report.

The sermon at Zion Evangelical Church for Sunday morning, March 6th will be: "The Relationship of the Church to the Community," and in the evening: "Jacob and the Cross of Limitation." This will be the first of a series of Sunday evening sermons on "Life's Crosses."

At St. Cyprian's Anglican Church on Sunday, March 6th, (Mothering Sunday) evening service will be held at 3 p.m., when Rev. R. K. Trowbridge, L.S.T. will take as the subject of his sermon, "The Three Mothers." People of English descent are especially invited to attend this service of their mother church.

Mr. W. A. Austin attended the annual meeting of the Red Cross Society last week. While there, he visited the Red Cross Children's Hospital, in which two Didsbury children are patients. He speaks very highly of this institution, and says that if the general public could realize the wonderful work that is being done, they would give it generous support.

On Wednesday evening last a large crowd gathered at the home of Mr. and Mrs. H. Wait, east of town, where a shower was given in honor of Mrs. W. H. Smith, nee Della Buckler. The shower came as a complete surprise to the happy couple, who were recipients of many useful and handsome gifts. Dancing and contests were among the evening's chief amusements, and all present were regaled with a luscious luncheon. The gathering eventually dispersed about the break of dawn, after spending a most enjoyable evening.

Motorist Sent to Jail.

One motorist was sent to prison, and another fined last week when they appeared before Magistrate Phillipson on charges laid under the Vehicles and Highways Traffic Act. Carl W. Swartney, 20, alleged to have driven his car while he was in an intoxicated condition, was sentenced to seven days' hard labor at Lethbridge Jail. He pleaded guilty to the charge.

Found guilty of having driven a truck at an unreasonable rate of speed, Joseph Dick, Didsbury, was fined \$15.00 and costs. He pleaded not guilty to the charge, but evidence showed that he had passed several cars at a high rate of speed.

Loan is Oversubscribed By 15,000,000 Dollars

Success of the Alberta loan puts the province in an absolutely safe financial position, declared Premier Brownlee when expressing gratification over the result.

The premier pointed out that the estimates provide for a balanced budget.

With the loan a success, the province could be in a position to take care of its \$1,000,000 maturity in New York on April 15th, while it could also, to a large extent, pay up its loan from the banks.

"It leaves us with apparently a clear line of credit to meet emergencies during the next year," said the premier.

Mr. J. Boorman went to Lacoules on Monday to attend the funeral of his father-in-law, Mr. I. O. Coverdale.

Coming Events

The Ladies Aids of the United Churches of Westerdale, Westcott and Didsbury will give a grand concert in the Opera House on Friday evening, March 4th.

Rehearsals dance in the Oddfellows Hall, Monday evening, March 7th, instead of February 29th as formerly announced. Good music by the new local orchestra.

Ladies Aid Bazaar and Supper at Westerdale Hall on Wednesday, March 9th at 6.30 p.m.

Don't forget the local Oddfellows annual St. Patrick's dance in the Opera House, March 17th. Keep the date in mind.

The music and the price will be right on the 30th of March.

Mothers, Fathers Entertained.

The members of the C.G.I.T. and Taxis groups, together with the Trail Rangers, entertained their "fathers and mothers" to a social evening at the Knox United Church Friday evening last, and there was a larger attendance than at previous similar occasions.

The chair was occupied by Rev. A. J. Mitchell, and the program opened with a sing-song led by the Taxis leader, Mr. J. Boorman.

The toast, "The Mothers" was given by Miss Dorothy Ranton and replied to by Mrs. Mitchell.

Edith Carden gave the toast, "To Our Dads," and Mr. Fred Moch replied.

Stands were performed by the boys group, and the girls presented a skit from "A Midsummer Night's Dream."

Miss W. Gillooly, the travelling secretary of the C.G.I.T. for the province of Alberta, gave an address and told of the work with the "teen age" girls and boys in the province. She complimented the leaders on the work being done in Didsbury, and explained that the work was inter-denominational and was shared in by different Protestant denominations.

After the program the guests were taken to the basement of the church and all indulged in numerous games. A delightful supper brought the evening to a close.

731,605 Alta. Names Counted in Census

Final figures of the population of Canada by provinces, as shown by the 1931 census, were announced by the Dominion statistician recently. The population of the Dominion is 10,374,196 compared with 8,788,483 in 1921, an increase of 1,585,713.

Alberta population increased from 588,451 to 731,605. British Columbia from 524,882 to 694,263; Yukon from 4,157 to 4,350. New Brunswick increased from 387,876 to 408,219, 5.25 per cent. Quebec increased from 2,361,199 to 2,874,258; Ontario from 2,933,622 to 3,431,685. Manitoba increased from 610,118 to 700,139, and Saskatchewan from 757,510 to 921,785.

Prince Edward Island population dropped from 88,613 to 88,038; Nova Scotia dropped from 528,817 to 512,846, and the Northwest Territories from 7,988 to 7,133.

British Columbia during the last decade has increased in population at a greater rate than any other province. In total population it now stands sixth in the Dominion, following Ontario, Quebec, Saskatchewan, Alberta, and Manitoba.

In Times Like These

In the course of the more or less extensive reading in which every man in newspaper work must engage, our attention was attracted by a magazine article bearing the title "In Times Like These," written by former U.S. President Calvin Coolidge. Coming from the pen of such a noteworthy man we felt assured that it would be a worthwhile article. We were not disappointed, and have decided to pass on to the circle of readers of this weekly column some of the thoughts expressed by the only living ex-President of the United States, in the hope and expectation that they may be found helpful and provide encouragement to others.

Mr. Coolidge expresses the opinion that one of the serious results that come from the experience through which the world has been passing for the past two years is "loss of faith," and he proceeds to show that if a man but keeps his faith, regardless of anything and everything that may happen, there is still a bright future before him.

The difficulty is, that because some have put their trust in things which they have found to not always endure, they draw the hasty and unwarranted conclusion that it is useless to have faith in anything. Furthermore, there is a tendency, and it is easy, to conclude that whatever disasters may have overtaken an individual for him to conclude that they have arisen through no fault of his own; rather that it is the fault of someone, and he is inclined to blame something he loosely calls society.

It is true that some have lost through the dishonesty of others. Many more have lost because they were tempted to take large risks in the hope of making large gains. Some did make large profits, but many more suffered heavy losses. Frankly, it must be said that those who trust to chance must abide by the results of chance. They have nobody to blame but themselves.

In Western Canada, however, probably the larger number of losers are to be found in Mr. Coolidge's third group, those who have sustained losses notwithstanding the exercise of their best judgment and through causes beyond their own individual control. But this simply means what everyone should know; that even when surrounded by all the safeguards and all the integrity which is possible to secure, the ownership of property involves a risk. The man who has nothing runs no risk; it is the man who has property who is liable to suffer. Nevertheless no sane person prefers to be the farmer rather than the latter.

The man who owns a house may lose it by fire, by flood, by a devastating storm. A man's livestock may sicken and die. A man may lose his crops by drought, or hail, or insect pests. World conditions may force prices to a below-cost-of-production basis. He cannot help these things, but that does not excuse him from making the most of what he has. The great fact of life is uncertainty, as Mr. Coolidge points out. The only thing we can do is to recognize the uncertainty and govern ourselves accordingly.

It might be a great personal comfort if we could lay all the blame for our misfortune upon some source outside ourselves. That is why it is easy to convince some of us that we have not failed, but society has failed. But while there is a relationship of all of us, which we term society, that differs from each of us, just as a house differs from the individual bricks in it, yet people are not bricks, and moral responsibility cannot be shifted to others. If we are to be free to make our own choices in life, we must take the risk of being responsible for the results.

If we could lay the blame for present conditions in the world on society at large, against whom is the blame to be assessed? It is impossible to point out any general moral lapse, any widespread dishonesty. We may say it is the result of greed and selfishness. But what body is to be specifically charged with that? Were the wage earners too greedy in getting all they could for their work? Were the managers of enterprise, big and little, too greedy in trying to operate at a profit? Were the farmers too greedy in their production or in co-operating to get higher prices for their products?

No, the most we can say is that there has been a general lack of judgment so widespread as to involve practically the whole world. Each and every one of us must assume our full share of responsibility for that lack. We have found out that we were not so big as we thought we were. We were rising too high. We shall have to keep nearer the ground. We may not feel so elated but we shall be much safer.

We must realize that the best hope for financial security is to live within our means. That is our ancient faith. We have found nothing better.

We must relearn the old Biblical admonition: "Thine own right hand can save thee." We must realize that Governments are not all-powerful, that present relief measures are but a crutch to help us for a moment when we cannot otherwise help ourselves, but that our salvation, our whole future, rests with us as individuals.

There is no power that can absolutely guarantee us economic security. We think we want relief from toil and worry, forgetful that our real satisfactions are in our achievements. If we will but make the effort to develop them, if we will apply ourselves faithfully to our tasks, we shall all end we have proven we did not know are presented.

The total value of building and construction awarded in Canada during 1931, as compiled by MacLean-Building Reports, Limited, amounted to \$315,482,000. Ontario led all the provinces with \$125,125,000, or 39.8 per cent of the Dominion total. Quebec comes next with \$106,125,000 or 33.6 per cent.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Starns, R.R. 5, Pictou, Ont., writes: "I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks.

My mother also has great faith in them and took no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Astrologer Makes Some Unpleasant Predictions

Says 1932 Hard Year For Cattle and Married People

Prof. Gustave Meyer, of Holoken, New York, who describes himself as "the nation's counselor and American seer," has predicted that his eyes heavenward, added up several rows of figures and predicted that 1932 is going to be a tough year for cattle and married people.

In scanning the planets for his annual first-of-the-year forecast, Professor Meyer considers that Japan and China are going to have much trouble, and that Japan will get the best of it in the long run. He feels that prohibition is going to have "a terrible time" during 1932, that prosperity is coming back to stay, that Colonel Lindbergh and Henry Ford had better watch their step in February and that next Fall there will be plenty of rain, snow, hail, thunder and lightning, floods, earthquakes, bank failures, broken legs and stomach trouble.

Among those who will suffer during the year, according to the professor's charts, are theatrical people, hotel and restaurant people, steamship people, bull traders, naval officers and cabinet members.

Those who will enjoy good luck include literary people, scientific people, astrologers, mining men, real estate agents, President Hoover, soldiers, diplomats and all the unemployed.

Stockmen Elect Officers

Meeting of Canadian Livestock Co-Operatives Held At Saskatoon

W. A. Amos, of Palmerston, Ontario, was elected president of the Canadian Livestock Co-Operatives at a meeting of the directors held at a meeting of the directors held at the Saskatoon. He succeeds W. D. MacKay, of Saskatoon. Roy McPhail, Brandon, was elected vice-president of the organization.

Directors for the provinces are: Alberta—J. E. Evanson, Taber; Saskatchewan—W. D. MacKay, Saskatoon; Manitoba—Roy McPhail, Brandon; Ontario—W. A. Amos, Palmerston; Quebec—J. T. Desmarais, Montreal; Maritime—J. McChlain, Prince Edward Island.

Persian Balm tones and stimulates the skin. Pleasant as a flower, cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexion of exquisite charm. Adds a subtle finish to the fairest woman. Invaluable for softening the hands and mending them flawlessly white. Cool and refreshing. Delicately fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Real Benefit To Farmers

Shipping Club In Quebec Markets Produce To Advantage

A fine example of the real benefit to farmers in getting together to market their products is afforded by the results obtained by the Campbell's Bay Shipping Club of Pontiac County, Quebec. This year to date the club has marketed 250 head of cattle, 250 calves, 1,150 lambs, and over 12,000 pounds of dressed poultry, representing cash returns to the farmers of that district of well over \$15,000. The Federal and Provincial Departments of Agriculture have co-operated effectively in making the scheme a success.

Sores Heal Quickly. Have you a persistent sore that refuses to heal? Then try Dr. Thomas' Electric Oil in the dressing. It will stop stinging, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among old and numbers of people can testify that it healed where property applied.

Cancel Hoard Gold

Venezians who have taken to hoarding gold in their mouths in the form of fillings, crowns and bridge-work have bitten off more than they can chew. Firms which cast gold bridges and similar material for dentists, have been doing a good business lately. The National Bank, which now has the sole right to sell gold, has temporary fillings will have to do until the gold crisis is past.

The modern telephone instrument consists of 261 parts.

New Ideas For Cars

Many Advanced Methods Will Feature Automobiles Of Future

The automobile industry, in its quest for new features to intrigue the buying public, spends millions of dollars annually in experimentation on advanced methods of automobile construction. Many of the ideas which result from the extensive research of the industry's engineers seem radical at first glance, but are a forecast of what may be expected for future automotive transportation. Among the many possible developments discussed in engineering circles is such a startling suggestion as a gasolineless, wireless car, propelled by radiated electricity. Another unusual proposal calls for the use of an airplane type of construction for cars, with large fenders and a combined roof and wing structure lifting a considerable amount of weight from the road, and with propulsion furnished by a propeller.

Drop In Living Costs

Reduction Of Fifteen Per Cent, During Last Two Years

Cost of living has dropped by over 15 per cent, during the past two years, the Dominion Bureau of Statistics reports. This is the second largest decrease among the leading nations the United States leading with a drop of 14.5 per cent.

Germany ranks third with a 12.5 per cent drop, Great Britain fourth with 8.6, and France fifth with 8.9 per cent. One of the reasons Canada, United States and France rank so high is the extensive agricultural developments of these countries.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick sure remedy. Also recommended for burns, sprains, sores and inflammation.

Land and Water Ferry

Hotel guests at Devonshire, England, now use a ferry that travels on land or sea. It is equipped with tractor wheels for land, and a propeller is driven off the tractor motor to drive the ferry through water.

In 1807, the first rats of pine in the Ottawa Valley reached the City of Quebec.

Man Without a Country

Fitting Plight Of Negro Who Was Deported From Canada

Chained to a grating in the hold of a ship in port, where he has remained for more than a month, is another man without a country.

He is Cecil Jafes Scott, 29-year-old negro deported from Canada and unwanted in his alleged homeland of Bermuda. He was put aboard the steamer "Borsani" at Halifax, and when permission was refused to land him at Bermuda or Bonaire where the authorities had no information concerning him, the only alternative was to bring him back to Canada. Having previously been deported from the Dominion, he was refused admission when the "Borsani" arrived at St. John, and now the captain and immigration officials are wondering what they shall do with the passenger.

The steamer's owners are liable to a \$10,000 fine if the deportee escapes. So "down below," in an imprisoned cell formed by a grating, is the "man without a country," his right wrist fastened to the steelwork and a blanket serving for a bed.

Ship Fox Skins

Seven Thousand Pelts Leave Quebec For London Market

During recent days 7,000 fox skins have been shipped from Quebec to be placed on the London fur market, according to information given out at the office of the Co-Operative Fur Animals Raisers of the province of Quebec. This shipment of skins, the largest ever sent out from here, is valued at \$200,000 and consists only of skins of the best quality.

In the face of orders on hand at present, Co-Operative officials say, it is probable that an additional 12,000 skins will be placed on foreign markets in the very near future.

Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 25 years would see the emancipation of agriculturists from domination by bodies outside themselves, H. S. Arkell, secretary of the Canadian Live-stock Pool and president of the Canadian Society of Technical Agriculturists, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard.

The society had made great strides since it was formed in 1921, and now included most of the technically trained agricultural men of the Dominion. In the past the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to turn its attention to study the condition of agriculture. It was for the betterment of agriculture that they had received their training.

From the point of view of the farmer, the selling machinery under the old methods had failed them, the credit machinery had fallen down and they would find that the majority of farmers believed that the technical machinery of agriculture was failing to accomplish the purposes of the farmers.

Agriculture had taken care only of production and left someone else to take care of marketing. In all other businesses an increasing proportion of the brains was devoted to merchandising. Something should grow up in technical agriculture in regard to the business end as in production.

It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June, when it might be possible to secure speakers from the economic conference.

Dr. L. E. Kirk, Dominion Agrostologist, suggested that other businesses had perhaps devoted too much attention to merchandising and persuading the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Eastern experimental farmer, agreed that farmers at the present time were much more concerned with what they were to do with what they had produced than with how to produce more or better articles.

Guests introduced at the gathering included: C. H. Gilbert, Pig Raiser, spring wheat champion at the Chicago show, and Andrew Anderson, Alaska, recently designated "master farmer."

Box Palace a Public Museum

King Alfonso's former royal palace at Madrid has been opened as a public museum. For the sum of one dollar visitors are allowed to see the throne room, sitting rooms, banqueting halls, the famous "Hall of Columns," where so many functions, including that of the washing of feet on Good Friday, took place, but so far they have not been permitted to visit the private apartments and bedrooms formerly occupied by King Alfonso, Queen Ena, and the Infantas.

Neighbors: "Er — Mrs. Brown — you've got odd stockings on." Mrs. Brown: "Yes, dearie, that often happens to ladies who've got more than one pair."

"How did you get so much strength in your mouth?" "I have exercised my teeth with your steak." — In 420, Florence.

W. N. U. 1925

Greater Precipitation

Report Of Meteorological Service For Month of December Is Encouraging

Precipitation in Saskatchewan over the cultivated portion, during December, 1931, was approximately twice that of December of the normal year, according to the report of the Dominion meteorological service for the month.

In average years, precipitation in December varies from four-tenths to about eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several points were exceptions, reporting less than four-tenths of an inch of precipitation received during December.

Alberta rejoiced in precipitation that was in excess of the normal. In December of one inch and one half inches was reported from a considerable portion of the plains. Usually the December precipitation in these areas varies from less than one-half to about three-quarters of an inch.

A dry December was the experience of Manitoba, where most sections reported less than half an inch and some less than one-tenth.

In the majority of years, December precipitation is slightly greater in Manitoba than in Saskatchewan, ranging from one-half inch to one inch. Regina Leader.

Apples Are Cheap Food

Essential Part Of Diet and Suitable For Every Meal

In a period like the present, when the amount of money available for food may be limited, apples are an essential part of the diet, says Miss Flora Carl, of the Missouri College of Agriculture. "Apples are suitable for every meal in the day and are often enjoyed between meals also," she goes on. "As sauce or baked apples serve as a breakfast fruit, are with bacon or sausage they may accompany the meat dish. For dinner they are especially good with fresh or cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots or scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables, and the choice of apple desserts is almost unlimited.

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are kleptomaniacs.

Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing in the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day.

The B.C. Egg Pool is shipping to the prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to G. R. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight charges of approximately \$850 and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is bound to stimulate confidence in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced prices received for the product.

George P. Wallace, president of the B.C. Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is not the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

France Buying Wheat

French Government Contracting For Ten Million Bushels Of Canadian Grain

Delivery has started on a French government contract to buy 10,000,000 bushels of Canadian hard spring wheat, the United Press learns. The agreement represents a repetition of an order for a similar amount in 1930. Delivery will continue for two months.

It was understood that France expected a reciprocal concession from Canada favoring either French wheat or silks, but no agreement has been reached.

It was estimated that France still requires 11,000,000 bushels of foreign wheat to meet the deficit in domestic supplies.

What representatives were awaiting indications of whether the foreign office would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

Nearly 40 irrigation projects are to be launched in Yugoslavia in the next four years.

Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations In Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the antics cats get up to when a storm is approaching. They wander recklessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, wash right over their coats when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind, of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to cover up their holes carefully before hard weather comes. Donkeys invariably bray lustily before rainy weather, and if he is returned to the hives and do not come out again for a time rain is indicated.

Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers In Montreal

"The League of Justice To Animals" with voluntary workers operate a farm of 15 acres at Montreal, the only one of its kind in Canada, where lost, strayed or unwanted animals found on the streets of Montreal and environs are taken, and when not claimed within a reasonable time are placed with new owners. At this home there are adequate kennels for cats and dogs, stables for horses and good grazing land with plenty of shade trees. Every type of creature is cared for from goats to canaries. Horses whose owners are too poor to feed them properly are taken and within a short time returned in good condition.

In the society's six years of befriending the dumb animals, it has had four Christmas trees set up in various parks and squares here distributing hay, corn and oats to 100 horses yearly.

Noise Affects Eyesight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the rural areas is only one in every 100. An eye specialist said:—"During the war one of the effects of shell-shock was a narrowing of the victim's vision. Perfect eyesight depends on perfect nerves, and town dwellers today are exposed to a nerve-shattering barrage of noise which differs only in degree from a great gun cannonade.

Hidden away in vaults in Dominion observatories at Victoria and Ottawa are scientific records that may prove or disprove some day the truth of the theory that North America and the other continents are not fixed or stationary. Dr. Alfred Wegener, the Austrian geologist who first laid down the theory that continents float on a sea of molten rock like rafts on a quiet ocean, Canadian scientists hope to supply the facts and figures that will determine the accuracy of the theory.

Canada is vitally interested in settling the Wegener theory because Greenland is supposed to be the "speed king" among the continents, crawling westward at a rate estimated as high as six miles a year. Meteorological conditions, especially along the Labrador Coast, the Maritime Provinces and the New England States, would be affected by any appreciable narrowing or lengthening of the distance between the two land masses.

Detailed scientific observations were made some years ago at the Dominion Government Observatories at Victoria and Ottawa. Longitudinal measurements were extended around the world with the aid of beam wireless. The positions of America, Greenland and other countries were plotted as minutely as possible. The observations will be repeated in 1933 and again in 1935, and any variation in the plottings will be noted. By this means it is hoped to establish the accuracy of Dr. Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1907 by J. B. Koch, German explorer. In 1823-81 years earlier—Sir Edward Sabine, British scientist, made longitudinal observations in Greenland but when Koch took similar readings at the same spot, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

Great Natural Asset

High Grade Clay Deposits In Saskatchewan May Prove Foundation Of Great Industry

One of the greatest natural assets of the prairie provinces is constituted in the high grade clays of southern Saskatchewan, said G. M. Hutt, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the officers' association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

In describing these valuable western resources, Mr. Hutt told of the general work of his department in fostering Canadian industry by locating deposits of minerals and sources of other raw materials and by assisting in bringing these materials into use. W. C. Casey, president of the association, was chairman.

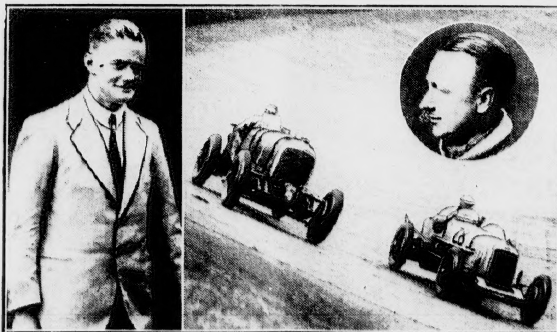

Advertising Always Pays

The business has not been found in which "advertising" does not pay. What capital is to industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railroads.

"You are bandy-legged, Flanigan." "That is nothing. You ought to have seen my brother. He was so bandy-legged that he had to be buried in an old bass viol." — In 1913, Half Timsa, Gothenburg.

BRITISH SPEED EXPERTS PLAN SERIOUS INVASION OF EUROPE

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is contemplated by a group of the best drivers in the Motherland. The Italian "Mille Miglia" or 1,000-mile race, held every spring, is the only contest of its kind in the world, and last year, for the first time in the history of the race, an English car competed, driven alternately by an English and an Italian driver, neither of years race, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by the best racing team the Motherland could produce. Sir William Morris, British motor magnate, will back the venture, and Sir Henry Birkin (right), will be one of the drivers. It is expected Lord Howe will captain the team.

A More Beautiful Canada.

Every unimproved or unplanted home in Canada can be made more attractive by the judicious use of trees, shrubs, vines, flowers, and well-kept grass. The old saying that a home is not a home until it is planted very well, emphasizes the necessity and wisdom of planting.

Some places have lagged behind in the matter of beautification, and this is perhaps more noticeable in rural districts. However, there is abundant evidence to show that where intelligent attention is given to this matter, the results may be very satisfactory indeed.

Canada is a land of rare natural beauty—from the Beas d'Or Lakes of Cape Breton Island to those famous mountains whose feet are kissed by the waves of the Pacific. Nature has endowed this country with the most beautiful and greatest variety of natural scenic grandeur to be found anywhere in the universe. Mountains, lakes, forests, streams, plains, waterfalls, are to be found in great abundance. The unlovely spots are man-made, and it seems the least we can do is to make these man-made places sufficiently attractive that they will, in some measure at least, be in keeping with the great natural beauty to be found throughout this great Dominion.

The progressiveness and thrift of any community or municipality are often reflected in its appearance, and the best advertising any community can do is to present a pleasing appearance to the world, an appearance of progressiveness, thrift, and industry reflected by well-planted and well-kept public and private grounds.

We are influenced, to a greater extent than we realize, by our surroundings. Children are particularly sensitive in this regard. Surely a home in and around which flowers are grown is a better place to bring up children than a home where no attention whatever is paid to these friends of the plant kingdom. "As the twig is bent, the tree is inclined" is an old saying and very applicable in connection with the training of children. If children are taught to love flowers and to become familiar with them, their hearts will be filled with love for these things, which will leave less room in their hearts and minds for the things that hurt and destroy.

We frequently meet with the objection that gardens and flowers cost too much, or that they take too much time. The truth is that it is not so much a matter of money or time, as it is of desire and disposition.

If we are disposed to have gardens and flowers and really desire to have attractive home surroundings, we will have them no matter how busy we may be. Your nearest experimental farm or agricultural college will gladly give you information regarding suitable varieties for your district. The cost in any event is the only trifling, and the amount spent on the money well necessary to improve the average size home will be one of the finest investments that possibly can be made. It will pay every dollar in satisfaction and will increase the value of the home.

Your individual efforts in making your home more attractive will improve your street, if your street is

LOCAL & GENERAL

J. Scrutton is announcing six small photographs for 25 cents.

Miss Grace Irwin will do marceling and finger-waving in the Peterson Block. Marcelling 35 cents; finger-waving 35 cents.

Watch out for the rose ball on March 30th. It will be the big dance of the season—a leap year dance!

Auction sale in Didsbury. List your supplies now—horses, cattle, hogs and farm machinery for the auction sale which I will hold on Sat., Mar. 5th.—J. W. Phillipson.

The Rebekahs are giving a dance in the Oddfellows Hall on Monday, March 7th instead of February 23rd as previously announced. The music will be supplied by a new local orchestra.

Lewis Stone in "The Bargain" is the feature picture at the Opera House tonight, (Thursday), 8.30, with Doris Kenyon and Charles Butterworth. The prize-winning picture for 1931. Also chapter 6 of "The Nevada Buckaroo."

"The Nevada Buckaroo," at the Opera House Monday evening next. Features Bob Steele, handsomest cowboy on the screen, can fight as well as he can love, and ride—why, horses can't go fast enough for him! Also episode 7 of the serial.

A fireman! Of what is he made? He has to value life so lightly that he can lay down his own as part of his duty, part of his job! See that greatest of all fire-fighting spectacles, "The Third Alarm," at the Opera House Thursday evening only next week. Also "The Price of Silence," the 7th evening episode of "Phantom of the West."

Young People Make Drive For Funds.

From February 27th, until March 8th, the C.G.I.T. girls and the Trail Rangers and Tuxis Boys groups are making their annual drives for funds.

Those people of Didsbury who were at the service at the Father and Son, Mother and Daughter social evening on Friday, and the service in the Knox United Church Sunday evening, will have heard from Miss Gilheoly, Prov. Girls Work Secretary, what these funds are used for, and how urgently they are needed.

An opportunity is given to every one in Didsbury and district, who are interested in the boys and girls of Alberta, of helping to train them to become good Christian citizens.

Some member of the groups will call on you during the coming week to ask you to support as far as you are able, the work of building the best type of citizens. Your help in this will give you the privilege of sharing in this most vital of all tasks—the raising up of men and women to match our times.

Vigilantes' Days In New Bob Steele Film

Days of the vigilantes are vividly
brought to the screen in Bob Steele's
current western drama, "The Nevada
Badkaro," which will be at the
Didsbury Opera House Monday
evening next (one night only).

Organized as a protective measure
against the ravages of road agents,
the vigilantes successfully cleared the
Nevada Territory of bandits in a
very few months.

In the photoplay, Steele will be
seen as a road-agent and member of
a notorious gang. He reforms when
pardoned through a ruse by the
governor. When he seemingly lapses
into his old ways, a citizen's vigilante
committee takes matters into its
own hands and are about to hold an
impromptu hanging when Steele, as
"The Nevada Badkaro" is cleared
of the charges against him.

In supporting roles to the star
will be seen: Dorothy Dix, Ed.
Brady, George Hayes, Billy Eagle,
Glen Cavender and Artie Ortega.

Special Rates For Teachers & Students

Teachers and students attending
schools and colleges in all parts of
Canada, will this Easter be accorded
special holiday travelling privileges
over the C.N., C.P., and other lines
in Canada, according to an announce-
ment by the Canadian Passenger
Association.

The new concession provides for
round-trip tickets between any point
in Canada, to be available to all
students and teachers at the rate of
one-and-a-quarter times the regular
single way fare.

Hitherto, these tickets, which are
good for the duration of the official
school holidays, have been available
only to non-resident teachers and
pupils. Under the new ruling they
will now be made available to resi-
dent pupils and teachers as well.
This is in line with the special
Easter concessions to the public.

To procure these special tickets,
teachers and pupils will be required
to show an official certificate, which
may be obtained from the principals
of all Canadian educational institu-
tions.

British Wheat Set At \$1.30 per Bushel.

A standard price of 10 shillings a
hundredweight of 112 pounds, or
about \$1.30 per bushel at par for
domestic grown wheat is fixed in
the government's wheat quota bill,
the text of which was made public
in London last week.

The bill set the anticipated do-
mestic wheat crop at 60,400,000
bushels and this figure represents
19.5 per cent of 1929 consumption.
Ever since the last imperial confer-
ence a figure of 15 per cent has been
mentioned as the domestic quota in
the discussions of a possible empire
wheat preference plan, with the
dominions entitled to a quota of
55 per cent, the remaining 30 per
cent being left open to foreign com-
petition.

Weekly Joke.

A young teacher was evidently
striving to increase the vocabulary
of her charges. She had placed a
list of words upon the blackboard to
be used in sentences. Billy, a very
lazy pupil was called upon first:

"Billy, you may give me a sen-
tence in which the word 'dogma' is
correctly used," said the teacher.

Billy hesitated. Finally, in a
burst of confidence he replied:
"Our 'dog-ma' has seven pups."

NOTICE

NOTICE is hereby given under Section
11 of the Domestic Animals Act (Muni-
cipalities) that black, many, red, white
brands, star on forehead, hind feet white,
right front foot white, was impounded in
the pound kept by W. J. Schmidt, located
on the N.W. 18-31-5-5 on the 11th day of
February, 1932, and that said animal
was sold on the 22nd day of February,
1932 to C. Dickan, of Didsbury, and that
said animal can be redeemed by the
owner, or on his behalf within thirty
days from the publication of this notice
in the Alberta Gazette, upon payment of
all fees and costs due to the municipality
and the purchaser of said animal.

For information apply to the under-
signed:
A. BRUSO, Didsbury,
Secretary Treasurer,
Municipality of Mountain View,
Box 340.

A tree-planting plan on a large
scale to extend over a ten-year
period has been inaugurated in
Saskatchewan. It will embrace
the whole treeless part of the pro-
vince and is to be started at once.

Establishing a new record for
quick delivery, a shipment hand-
led by the Canadian Pacific Ex-
press Company went from South-
ampton to Vancouver in nine
days. It came over on the Em-
press of Britain to Quebec in less
than five days.

The Royal Yacht, largest hotel
in the British Empire, recently
staged the largest bridge tea and
fashion show ever held when over
1,100 bridge tables were in opera-
tion and nearly 5,000 guests at-
tended the function. It was held
in aid of unemployment relief
funds.

P. G. Wodehouse, world-famous
novelist and humorist, will write
his next novel aboard the Em-
press of Britain during the world
cruise which starts December 3
from New York. It will be a
continuation of the story of
"Jeeves" who has already figured
in several of his best sellers.

Butter production in Canada for
the first seven months of 1931 in-
creased 25,379,725 pounds or 15.5
per cent, over the production for
the corresponding period of 1930.
Exports in the same period were
5,140,000 pounds or nearly 4,000-
000 pounds more than in the same
seven months last year.

Certainly a seasonal, if not an
all time, record for a lady big
game hunter was recently estab-
lished in New Brunswick when
Mrs. Walter R. Peterson, of
Nashua, New Hampshire, shot
the moose, two buck deer and a bear
during a hunting trip in the Ser-
pentine section of the Tobique
district of the province.

Catfish leather may eventually
win favour with the lady of fash-
ion for her handbags or shoes.
Not until recently has a market
been found for catfish caught in
Nova Scotia, but a firm of leather
manufacturers in the United
States has found that a soft and
pliable product can be made from
the skins of catfish.

Radio is to be used for pro-
moting correspondence school
work in Saskatchewan. This
is an entirely new method of in-
struction for a prepared program
in the Extension Department of
the University of Alberta, for the
next few years.

A free subscription offering the
holder to one year in Arts and
four in engineering or to five
years in medicine at the Uni-
versity of Alberta by the Cana-
dian National Railway Company,
which has a credit record, exam-
ined by the University of Alberta,
is to be given to employees
who accumulate savings. Highest
credit is required for admission.
The University will
be awarded the contract for 1932.

New Chevrolet Six Owners Know What a Difference Six Cylinders Make!

SO many motorists have discovered the difference six
cylinders make that today the Chevrolet Six leads all
other automobiles in sales.

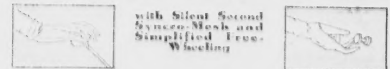

Six cylinders are better in every way. For example,
Chevrolet's six-cylinder motor "picks-up" in high gear
quickly and without vibration. You get away ahead of
the traffic and you do not have to shift gears so often.
Secondly, you can drive as fast and as far as you like
without any sense of strain or fatigue. For six-cylinder
travel is smooth, quiet and restful at every speed.
Then, too, Chevrolet smoothness is built-in smoothness
—inherent in six cylinder design and Chevrolet's method
of insulating engine from chassis by thick rubber cushions.
It protects against the wear-and-tear of constant vibration
as long as you drive your Chevrolet.

In addition to these great advantages, Chevrolet offers
you Free Wheeling with safe, silent Synchro-Mesh gear
shifting. It gives you effortless performance with
lowest operating costs of any full-size car, regardless of
the number of cylinders. And Chevrolet provides bodies
by Fisher — smarter, roomier and more lastingly quiet.
Drive a Chevrolet Six. You will find one pleasure and
advantage after another to emphasize
the fact: It's Wise to Choose a Che-
vrolet Six!

BABY'S COLDS

WORLD HAPPENINGS BRIEFLY TOLD

A Chinese boycott against Canadian salt fish is causing serious curtailment of trade on the Pacific coast.

Efforts to secure a preference for Canadian lumber in South Africa are being made in Ottawa by a committee in British Columbia.

A wooden chessboard was found in the ancient temple of Abou Simbel on the east of the Nile in Egypt in the hills of Dola.

Ireland is having the worst floods in 30 years because of unimpaired rains which have inundated thousands of acres of farm land and forced many families out of their homes.

David M. Shearer, 52, died January 14, from pneumonia. He was an outstanding construction engineer and had charge of the Government elevator construction at Churchill.

Dr. Hugo Eckener, commander of the giant German dirigible, Graf Zeppelin, was awarded the 1931 model of the International Aeronautic Federation.

A bylaw making prohibitive the sounding of locomotive whistles or clanging of their bells within the city limits between the hours of 10 p.m. and 7 a.m. has been passed by the city council of Quebec.

Sir Henry Frobisher Dickens, only son of Charles Dickens, the novelist, spent his 83rd birthday at his post of common sergeant of the City of London, England, an ancient magistrical position.

The John Scott award of \$1,000 was presented jointly to John de la Cueva and Harold E. Pittman for the invention and development of the autogyro. John Scott was a chemist of Edinburgh, Scotland.

Over 50 tons of express and 34,892 pounds of mail were carried on the north route between Edmonton and Alaska, by planes of a commercial aviation company during the season of 1931.

War's Lessons

Canadians Have Deep Interest in Situation in Manchuria

"We have not forgotten the lesson which we learned in 1914 of what an obscure crime in a Balkan state can mean," said Hon. Vincent Massey, former Canadian Minister to Washington, in addressing the Empire Club on Manchurian problems at Toronto.

"Canada needs no argument to show the situation in Manchuria is one to command her active interest."

He referred to the treaty of Washington in 1922, and the Paris peace pact, and said Canada, with the full obligation of nationhood, would have to decide for herself whether other treaty had been infringed or violated.

Any trade advantage accruing to Canada through China's boycott of Japan would be more than offset by loss of trade with Japan.

India exported 50,000,000 pounds of tea in a recent month.

Heavy Fur Catch

Catch This Year Promises To Be Best In Past Decade

The fur catch in the north country this year promises to be one of the best in the past decade. From early reports received from the fur north trappers will bring down heavy shipments of furs this spring.

The quality of the furs, a factor that varies from year to year, promises to be high, north trappers claim, because of the climatic conditions that have prevailed in the sub-Arctic regions this year.

While the catch in the more civilized portions of the province will be only average, north of Churchill and in the southern Indian Lake area the catch nears the spectacular. Prices for pelts this year are only average, dealers advise, and the royalty and heavy cost of bringing them into the United States will prove a handicap to disposed this spring it is feared.

The huge Jinkers' place purchased this year by the Canadian Airways will probably bring the furs down from many of the isolated posts in the fur north to Winnipeg.

FOR THE FRESH CHARM OF SPORTS CLOTHES THAT

PARIS ADOLPH

Here's a delightfully smart model that is carried out in tweed-like woolen in deep bright blue mixture, new 50 modish.

It gives the impression of suit styling. The collar is white plique. The findings are in navy blue. The belt is navy blue sash.

It has so much dash. It's such a splendid type for office or college wear.

Style No. 815 may be had in sizes 14, 16, 18, 20 years, 30, 35, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 39-inch material with 3 yards of 39-inch contrasting 5/8 yard of lining and 1/2 yard of 1/4-inch ribbon.

Jersey is a favourite this season and adapts itself perfectly to this model.

It may also be made of cantanville crepe silk.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Delightful Cruises

Curand and Anchor Line Steamers Furnish Sea Voyages For Those On Holiday Bent

That the world and his wife are going to see for their holidays more than ever before is evident in the fact that no less than fifty-six cruises have been arranged for Curand and Anchor Lines steamers during the remainder of this winter, spring, and summer. This does not include the departure this week from New York of the "Francine" on her first annual five-month cruise of the world.

The Maritimes and the St. Lawrence will get a good share of this cruise tourist business, for twelve cruises will call at Canadian ports which will form the main attraction for thousands of New Englanders expected on these short trips from New York. Last summer the "Transylvania" made three experimental voyages to Quebec and Halifax from New York with a 60-mile cruise up the Saguenay River, the largest vessel ever to navigate this famous waterway, and on each voyage she was booked to capacity. This summer and fall there will be six such 12-day cruises, by this steamer and her sister ship the "California" which will then make her first appearance on the St. Lawrence. Other cruises in which Canadian ports will be featured are three six-day cruises from New York to Halifax and Bermuda on the express "Mauretania," during the summer. The Anchor Line "Celestina" will make a 6-day cruise to Halifax, on August 27th, and on October 20th, a 10-day voyage will be made to the same port by the "Transylvania."

Several short summer cruises on express Cunarders and two Labor Day weekend cruises by the "Transylvania," and the "Berenburg," largest Cunarder, are also scheduled to call at Halifax. Elaborate arrangements for seeing Acadia are being made for these passengers.

Short, inexpensive trips to the West Indies continue to be popular, their success being indicative of the price trends of today. A call at Miami has been introduced into the itinerary of eight 9-day cruises to Havana and Nassau by the "Celestina," the visit to the Florida peninsula and the wealthy proving a great attraction.

More leisurely visits to the West Indies will be made on three voyages of the "California," and two on the "Seythia," ranging from 12 to 23 days and visiting all the high spots in the island group, as well as Panama and the South American mainland.

Bermuda retains its hold on the imagination of the cruise tourist public, the "California" and "Samaria," one of the 20,000-ton Cunarders, being listed to make Easter cruises from New York of 9 and 8 days respectively.

This Independence

A farm laborer in England who had been out of work for many months and had been living on the dole, remarked to his physician one day: "Doctor, do you know I had an offer to work some days ago which would have given me five shillings more a week than I am getting from the dole, but after thinking it over carefully, I preferred to remain independent."

Bermuda retains its hold on the imagination of the cruise tourist public, the "California" and "Samaria," one of the 20,000-ton Cunarders, being listed to make Easter cruises from New York of 9 and 8 days respectively.

Lost Money

Dead Accounts In Canadian Banks Reach Huge Total

In Winnipeg banks today there is more than \$100,000 of "lost" money, belonging to Winnipeg citizens. More than 2,000 citizens or their heirs, possess money which they either have forgotten about or which, although their own, they know nothing about. This is true because the annual statements made by the banks to the Canadian chartered banks show upward of 2,000 bank accounts at Winnipeg which have not been touched for many years, and in no case for less than five years. In most cases, the banks long ago ceased to credit these accounts with interest. They are "dead" accounts and unless claimed by the rightful owners may go on in the possession of the banks for ever. Parliament, of course, knows about the "lost" monies, but parliament by law has declined to take any action which might prevent owners from resuming proprietorship of their money.

As long as these banks stay in business, so long will the accounts be recorded and the balances held ready for payment. If a bank is wound up, or becomes bankrupt, parliament, under the Bank Act, steps in and takes these deposits into the national treasury, where they are held for all time to the credit of the owner, his heirs and successors. Upon proof of ownership, the full amount plus interest at 3 per cent. per annum must be paid. The banks, of course, pay principal and interest also, upon proof of ownership.

The number and amounts of these "dead" accounts total \$2,077,000, and the number must exceed 50,000. In hundreds of the Winnipeg cases, the owners must still be alive, probably in the city. They have forgotten their deposits. In other cases, the owners are dead and the heirs are unaware of the bank accounts.

Cleaning Units Needed

To Ensure Distribution Of Clean Seed To Farmers

In order to cope with the cleaning of seed grain for distribution to needy farmers this spring between 400 and 500 travelling seed cleaning machines will be necessary.

In addition to this, it is believed by grain men that every privately owned seed cleaning machine will have to be utilized if seed grain is to be properly cleaned in preparation for coming spring seed.

Over 1,000,000 bushels of seed wheat and at least 2,000,000 bushels of seed oats will be required for distribution before spring, entailing an expenditure of approximately \$8,000,000.

According to C. B. Daniel, manager of the Saskatchewan Relief Commission, the seed grain relief plan in Saskatchewan is a gigantic problem and it is essential that a plan be put into effect as soon as possible.

Definite steps toward adopting a scheme whereby clean seed can be supplied to the farmers of Saskatchewan through the seed grain relief plan are being formulated. The Relief Commission are being formulated, it is learned unofficially, Thursday, Jan. 14.

Across Africa By Train

Important Event That Was Calmly Accepted By The World

The first railway train to cross Africa from ocean to ocean started July 1, last year on its journey from Lobito Bay to Beira, a distance of 2,940 miles. The event was a vastly important one and the engineering achievement was worthy of note, but it was calmly accepted by the world. Yet when David Livingstone, the first white man to cross Africa, made the journey in two years, there was hardly anyone throughout all the world who didn't thrill to his grand adventure, and hardly a home where it was not a topic of constant interest. West Street Journal.

Estimated value of the British Columbia honey crop for 1931 is placed at \$233,874. There are now 2,934 apiaries in the province, containing 21,409 hives, which last year returned 570 tons of honey. The average yield per hive was 53.5 pounds.

One of the most interesting trips to be taken by a traveller in Vienna is a two-hour train in the tramway trip which carries passengers over the Alps.

SAFE, SPEEDY PROVEN!

Safe—Buckley's capsules are non-toxic—no harmful effects on the body and adults. Speedy—Acts like a flash—a single capsule proves it. Proven—Thousands of testimonials, letters and the largest sale of any single remedy in Canada. Proven—Winning evidence of its merits, 38-15.

To Assist Agriculture

Quota System Between Canada and Great Britain for Canadian Wheat

Establishment of a quota system between Canada and Great Britain, for Canadian wheat, was visualized as one of the great hopes for Saskatchewan agriculture in 1932 by J. D. MacFarlane, president of the Saskatchewan Agricultural Societies Association, who presented his annual report to an executive meeting of that association at the University of Saskatchewan.

Mr. MacFarlane also said a change in the styles of obtaining credit by the countries of the world was essential to economic recovery, and he believed cancellation of war debts, to enable world buying power to improve, was necessary if 1932 was to be a better year than the past year.

Even adoption of these changes did not give much hope for the present year, Mr. MacFarlane believed, but he thought they would tend to make next year more normal and would restore agriculture to a place more nearly approaching its old position.

Dispensing of the high rates of interest by one country to another would materially assist, he thought. He believed an international banking committee could render help in the situation, functioning similarly to the League of Nations, but dealing with the financial obligations and requirements of the countries of the world. Each country, under this system, would issue its own currency, instead of borrowing in New York or London, England.

A New Explosive

Drives Bullet Five Times Faster Than Sound Trays

The modern rifle bullet has a muzzle velocity of 3,000 feet a second. It strikes a tremendous blow, measured in hundreds of pounds. Now a German named Verlich has invented an explosive that will speed the bullet more than a mile a second faster, and will triple its striking power. That is more than five times faster than sound travels.

It is said that 500 different kinds of material are used for the manufacture of shoes.

BABY FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctors say. Constipation. To get rid quickly of the accumulated wastes which cause restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made especially for children's delicate needs. It is a pure vegetable preparation; contains no harsh drugs, no cathartics. It is so mild and gentle you can give it to a young infant to relieve colic. Yet it is as effective for older children. Castoria's regulative help will bring relief and comfort and restful sleep to your baby, even a baby with a hard. Genuine Castoria always has the name;

THE HOUSE OF DREAMS-COME-TRUE

—BY—
MARGARET FODLER
Author of
"The Splendid Boy," "The Hermit
Hodder & Stoughton, Ltd., London.

CHAPTER XI.—Continued.

Jean, glancing curiously across at Mrs. Craig, was startled at the sudden change in her face produced by Lady Anne's simple announcement. The yellow skin seemed to pale almost wither, like a cut flower that needs water, and the lips that had been parted in a smile stiffened slowly into their accustomed straight line.

"Of course," Mrs. Craig's voice sounded flat and she swallowed once or twice before she spoke—"that must be it. I know your father, Miss Peterson."

"To Jean, always sensitive to the emotional quality of the atmosphere, it seemed as though some current of hostility, of malvolence, leapt at her through the innocent-sounding speech. "I knew your father." It was quite ridiculous, of course, but the words sounded almost like a threat.

She had no answer ready, and a brief silence followed. Then Lady Anne bridled the awkward moment with some commonplace, ardently steering the conversation into smoother waters, and a few minutes later Mrs. Craig rose to go.

"I'll see you across the park, Judith," volunteered Nick, and he and his mother accompanied her out of the room.

In the hall, Lady Anne detained her visitor an instant with a light hand on her arm, while Nick foraged for his own particular headgear amongst the family assortment of hats and caps.

"Jean is a dear girl, Judith," she said earnestly. "I want you to be friends with her. Don't"—pleadingly.

When PAIN Comes

WHAT many people call indigestion is very often merely excess acid in the stomach. The stomach nerves have been over-stimulated, and food soars. The corrective is an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia.

The speed of this harmless, tasteless alkali is such that it neutralizes instantly many times the acid and the symptoms disappear at once. You will never see the same methods when you learn the efficiency of this. Get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. (See a bottle—any drug store. Made in Canada.)

W. N. U. 1926

"visit the sins of the fathers on the children."

"Why, no, I shouldn't," replied Mrs. Craig, with apparent frankness. "It was only that, for the moment, it was rather a shock to learn that she was—that woman's child."

Of course it was," acquiesced Lady Anne. "Goodbye, dear Judith."

But notwithstanding Mrs. Craig's assurances, a troubled look lingered in Lady Anne's grey eyes long after her guest's departure.

CHAPTER XII
A SENSE OF DUTY

Jean was immensely puzzled at the abrupt change which had occurred in Mrs. Craig's manner immediately upon hearing that she was the daughter of Glen Peterson, and, as soon as the visitor had taken her departure, she sought an explanation.

"What on earth made Mrs. Craig freeze up the instant my father's name was mentioned? Did she hate him for any reason?"

Tormarin looked across at her.

"No," he answered quietly. "She didn't hate him. She loved him."

Jean stared at him in frank astonishment. She had never dreamed that there had been any other woman than Jacqueline in Glen's life.

"Mrs. Craig—and my father?" she exclaimed incredulously.

"She wasn't Mrs. Craig in those days," she was Judith Burke."

"Well, but—" persisted Jean, determined to get to the bottom of the mystery. "I still don't see why."

"Why what?"—unwillingly.

"Why she looked as if she loathed the very sight of me. That's not—drily—"quite the effect you would expect love to produce!"

There was a curiously abstracted look in Tormarin's eyes as he made answer.

"Love is productive of very curious effects on occasion. More particularly when it is without hope of fulfillment," he added in a lower tone.

"Well, I suppose my father couldn't help not falling in love with Mrs. Craig," protested Jean with some warmth. "Nor could he have prevented her caring for him. And it's certainly illogical of me to feel any resentment towards me on that score. I had nothing to do with it."

"Love and logic have precious little to say to each other, as a rule," replied Tormarin grimly. "To Judith, you're the child of the woman who stole her lover away from her, so you can hardly expect her to feel an overwhelming affection for you."

"The woman who stole her lover away from her?" repeated Jean slowly. "I don't understand. What do you mean, Blaise?"

He glanced at her in some surprise. "Surely—Don't you know the circumstances?"

She shook her head.

"No, I simply don't know in the least what you are talking about. Please tell me."

Tormarin made no response for a moment. He was standing with his back to the light, but as he lit a cigarette the flare of the match revealed a worried expression on his face, as though he deprecated the turn the conversation was taking.

"Oh, well," he said at last, evading the point at issue. "It's all ancient history now. Let it go. There's never anything gained by digging up the dry bones of the past."

Jean's mouth set itself in a mutinous line of determination.

"Please tell me, Blaise," she reiterated. "As it is something which concerns my father and a woman I shall probably be meeting fairly often in the future, I think I have a right to know about it."

He shrugged his shoulders resignedly.

"Very well—if you insist. But I don't think you'll be any happier for knowing." He paused. "Still indefensible."

She bent her head.

"Quite," firmly—"whatever it is, I'd rather know it."

"On your own head be it, then," he seemed trying to infuse a lighter element into the conversation, as though hoping to minimise the effect of what he had to tell her. "It was just like this that your father and Judith Burke were engaged to be married the time he met your mother, and that—well, to make a long story short, he ran away with Miss Mavoray on the day fixed for his wedding with Judith."

A look of extreme bitterness crossed Tormarin's face.

(To Be Continued.)

COULDN'T COMB HAIR

Crippled by Rheumatism

"I had been suffering with rheumatism for about 2 years, and about this time last year was laid up for 10 weeks. My hair and skin and face were the worst affected. I could not get about at all. I could not wash my face or comb my hair. All this had to be done for me. At the beginning of this year I started taking Kneisschen Salts every morning and now I am able to see to my home and can go out in all kinds of weather without it affecting me."—Mrs. E. K.

Rheumatism is associated with an excess of Lactic Acid in the system. Two of the ingredients of Kneisschen Salts have the power of dissolving uric acid so as to render it capable of being easily washed out of the system. Other ingredients of Kneisschen assist Nature to flush out this dissolved uric acid through the bowels and the kidneys. Other ingredients still, prevent food fermentation taking place in the intestine, and thereby check the formation not only of uric acid, but of other impurities which poison the blood and pave the way to ill-health.

closure. Then Jenn uttered a low cry of dismay.

"My father did that? Are you sure?"

"Quite sure."

Tormarin could see that the story had distressed her. Her eyes showed hurt and bewilderment like those of a child who has met with a totally unexpected rebuff.

"Don't take it like that," he urged hastily. "After all, it was nothing so terrible. You look as though he had broken every one of the ten commandments"—smiling.

Jean smiled back rather wanly.

"I don't know that I should worry very much if he had—in some circumstances. You look as though you feel it was so cruel, so horribly selfish."

"You've got to remember two things in justification—"

"Justification?"—expressively.

"There wasn't any. There couldn't be."

"Well, excuse then, if you like. One thing is that Jacqueline Mavoray was one of the most beautiful of women, and the other, that your father's engagement to Judith had really been more or less engineered by their respective parents—adjoining properties, friends of long standing, and so on."

"It was as love-match-on his side."

"But on her wedding-day"—pitiably. "Oh! Poor Judith!"

Tormarin smiled a trifle cynically.

"That was the root of the trouble. It was Judith's pride that was hurt—as well as her heart. She married Major Craig not long after, and I believe they were really fond of one another and comparatively happy. But she has never forgiven Peterson from that day to this. And being Jacqueline Mavoray's daughter, will come in for the residue of her bitterness. Unless—ironically—"you can make friends with her."

"I shall try to," said Jean simply. "Is Major Craig living now?"

"No. He died out in India, and after his death Judith came back to England. She has lived at Willow Farm with her brother, Geoffrey Burke, ever since."

There was a long silence, while Jean tried to fit in the new facts she had learned with her knowledge of her father's character. She was a little afraid that Tormarin might misunderstand her impulsive outburst of indignation.

"Don't think that I am sitting in judgment on my father," she said at last. "In a way, I can—ever understand his doing such a thing. You know, for the last two years of my mother's life I was with them both constantly, and anyone living with them could understand their doing all kinds of things that I could not understand."

She paused, as though seeking words that might make her meaning clear. "They would never really mean to hurt anyone, but they were just like a couple of children together—gloriously irresponsible and happy. I always got years older than either of them. Glen used to say I was 'carried with a damnable sense of duty'—laughing rather ruefully. 'I suppose I am. Probably I inherit it from our old Puritan ancestors on the Peterson side. I know—I couldn't have cheerfully run off and taken my happiness at the cost of someone else's prior right.'"

A look of extreme bitterness crossed Tormarin's face.

(To Be Continued.)

Uniform Monetary System

Proposed That Effective Measures Be Taken By The British Empire

A memorandum strongly advocating the introduction of a uniform monetary system for the British Commonwealth of Nations was adopted by the Federated Chambers of Commerce of the British Empire.

The memorandum declares since most empire countries are now of the gold standard the struggle to attract and retain gold has ceased. But, in order to remain competitive in the world's markets, the nations are obliged to force down prices by currency contraction which has led to similar contractions by other nations, neutralizing the first advantage and depressing prices below the cost of production.

This, the memorandum says, has reduced the purchasing power of 91 per cent. of the world's population. So-called over-production, it continues, is really under consumption, owing to restricted purchasing power. No one nation can prevent this deflation, the memorandum contends, and the only group strong enough to take effective measures is the British Empire, within which members would insulate themselves from external competition while re-expanding their currencies, action which would make possible the establishment of sane co-operation.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestine, Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organism insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

New Treatment For Anaemia

Scientists Claim Extract Injection

A new and simplified treatment for pernicious anaemia eliminating many of the uncertainties and difficulties of present treatments, has been perfected by research scientists at University of Michigan.

The new treatment involves intravenous injection of concentrated liver extract and obviates the necessity of frequent doses of liver extract or substitutes administered by mouth against which patients rebel.

Four to six injections of the new extract into the veins of a pernicious anaemia sufferer have restored the blood to normal. After the blood has been replenished with red corpuscles, it is possible to maintain this state by single injections at intervals of from four to six weeks.

When You CAN'T QUIT

Fatigue is the signal to rest. Obey it if you can. When you can't, keep cool and carry-on in comfort.

Aspirin was meant for just such times. It assures rest and comfort. Freedom from those pains that nag at nerves and wear you down. One tablet will break down threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Garry Aspirin tablets when you travel. Have some at home and keep some at the office. Like an efficient secretary, they will often "save the day" and spare you many uncomfortable, unproductive hours. Aspirin is harmless, so keep it handy, keep it in mind, and use it. No man of affairs can afford to ignore the score and more of uses explained in the "Green Directions." From a grumbling tooth to those rheumatic twinges which seem almost to bend the bones, Aspirin tablets are ready with quick relief—and always work. Neuralgia, Neuritis, Any aching, needless pain.

You're Worried

When your child is sick you're terribly worried. Of course you can't always avoid sickness, but you can remedy and often prevent children's ailments with Baby's Own Tablets. They are the ideal medicine for children. Doctors prescribe them.

Baby's Own Tablets reduce fever, clear colic, prevent constipation, soothe the stomach, and help to clear up colds. 25 cents a package at any drugstore.

BABY'S OWN TABLETS
(Dr. Williams') 17c

Little Helps For This Week

"That the Lord thy God may bless thee in all the ways of thine hand which thou dost."—Deuteronomy xiv, 29.

No earnest work. Of any honest creature, howbeit weak. Imperfect, ill-adapted, fails so much. It is not gathered, as a grain of sand. To enlarge the sum of human action used.

For carrying out God's plan. —Elizabeth Barrett Browning.

Our life is but a little holding, lent. To do a mighty labor. We are one With Heaven and the stars when it is spent. To serve God's aim.

—George Meredith.

"Find your niche, and fill it. If it be ever so little, if it is only to be heaver of wood or drawer of water, do something in this great battle for God and truth."—Spurgeon.

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is unethically different from other so-called remedies. Were this not so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Britain and War Debts

So far as this country is concerned there is certainly a widespread belief that general cancellation of reparations and war debts would facilitate economic recovery and, therefore, be generally beneficial; but the British taxpayer would not lightly entertain the idea of cancelling reparations while retaining the burden imposed by war debts. London Times, England.

Get the genuine tablets, stamped with the Bayer cross. They are of perfect purity, absolute uniformity, and have the same action every time. Why experiment with imitations costing a few cents less? The saving is too little. There is no risk at all. But there is economy in the purchase of genuine Aspirin tablets in the large quantities.

Mountain View Notes

Many farmers will rejoice at the snowfall that occurred Monday, as they don't appear to wish the arrival of spring yet.

The W.I.G.C. met recently at the home of Miss Ellen St. Clair. After the business was disposed of, a novelty competition was staged by the president, Miss J. Wilson, the prize going to Miss Birdsell of Gore district, at whose home the next meeting is to be held.

Mrs. Ed. Barnes entertained at a whist party on Tuesday of last week. The winners were: Miss J. Wilson, ladies' 1st, and Mr. H. Roberts, gentlemen's 1st. Mrs. Hill and Mr. Shultz were winners of the consolation. After cards, lunch was served and the guests thanked their hostess for such a splendid social evening.

Several neighbors gathered at the home of Mrs. Wm. Coates recently when a carding bee was held. The hostess served a delicious dinner and all enjoyed the afternoon immensely. Many were only able to take lessons in the carding of wool, but it takes the experienced hands to exhibit the indefatigable artist at this craft.

Melvin Notes

Douglas Johnston is spending the week with Mr. J. Manson.

Mr. and Mrs. A. Krebs spent Sunday with Mr. and Mrs. Cowitz.

Much sympathy is extended to Mr. and Mrs. J. Luft on the loss of their infant baby on Monday.

Miss Ethel Krebs is spending the week with Miss Dorothy Youngs at Ennerdale.

Mr. and Mrs. Trotter, Carstairs, and Mr. Yates, also Mrs. Larson and little daughter, visited Mr. and Mrs. Geo. Youngs on Monday.

There was a large number of voters turned out to vote, Saturday, and Mr. G. Carlson will again be our councillor this term.

Dr. Liesemer, Didsbury, will give a talk on "The Pyramids" at the club on Saturday night. It is hoped a good crowd will be present to hear this interesting lecture.

Wedding bells have been ringing in our district. When Miss Nina Reese and Mr. Ivan Graham went to Calgary last week, they returned as Mr. & Mrs. Graham. We offer them our congratulations.

The Go-Getters held a very pleasant whist drive in the school on Tuesday evening. First prize for ladies went to Miss Marion Fisher, and the first prize for gentlemen to Mr. Albert McLaure. Consolation prizes were won by Mrs. L. Chandler and Mr. Alfred Durrer.

Springside Notes.

Alfred spent Sunday at home.

Mrs. Orde was a visitor in town during part of the week.

Mr. F. McDonald entered the Holy Cross Hospital last Friday to undergo an operation. We hope everything turns out for the best.

Mr. J. Rodney was a Calgary visitor the latter part of the week.

The schoolhouse was a busy place on Saturday.

Tolmi was a visitor at the Neilson home a week ago Sunday. He later felt indisposed and was confined to his bed.

Last week's chinook reached big proportions as can be seen by damage done to Ivins barn roof.

Mr. and Mrs. LeClaire and boys, were dinner guests in Carstairs, on Sunday.

Mr. and Mrs. Sanderman visited Mrs. Cuffling on Sunday.

Mrs. McDonald and girls visited at the Hardy home on Sunday night.

Tolmie has taken up with the Collinge boys for the year.

Last Friday night our monthly social was held at the schoolhouse.

WARNING!

EASTER
IS EARLY

Order Your
New Clothes

now

Meet Me at RANTON'S

Farmer Commits Suicide.

George Feil, farmer, living east of town, was found to have committed suicide at his home on Friday afternoon.

Feil, who had been despondent for some time, left the house in the forenoon, and as he did not return, a search was made and he was found hanged in the barn.

The coroner was called, but an inquest was declared unnecessary.

Deceased, who was 49 years of age, was born in Russia and came here from Germany about seven years ago.

The funeral was held from the Durrer Funeral Chapel on Monday, Rev. J. J. Kuring officiating.

GET YOUR LICENSE PLATES!

It is customary for the government to give warning regarding auto license plates, and now that the season has so far advanced, auto owners are warned that the police have been notified to check-up on all cars bearing 1931 plates.

If you can't afford 1932 license plates, you can hardly afford to take a chance on contributing toward the provincial deficit, so just have this in mind when you next come to town.

"The policeman may get you if you don't mind out."

A very good programme was put up by the organizers. It would take too much space to go into details, suffice to say everyone had a good time. Another social is in progress.

On Friday, March 11th, a dance will be held at the school. Music will be supplied by a well known orchestra. After supper it will be a leap year dance. Watch for posters.
